Design doesn’t have to be loud to make a big impact. The “less is more” philosophy sharpens the focus on what really matters in your design.

A backyard with a view needs only two chairs by the fire to complete a rustic design that coincides with nature.

Using a pop of color around your front walkway, like a bright colored door, is a little change that adds big curb appeal.

Keeping landscaping simple not only reduces the amount of time a homeowner spends on yardwork but also places focus on their investment.

In the ever-expanding age of technology, many rising trends center on the health benefits of incorporating design elements that help keep us connected with the natural world. This can be done both texturally and by integrating organic elements like water, fire, wood or plant life into the hardscape design.
Intertwining the natural and built environments can soften a contemporary look and create a sense of wellbeing.

INTRODUCING
BELGARD'S COLOR OF THE YEAR

LIVE LIFE IN COLOR
INTRODUCING BELGARD’S COLOR OF THE YEAR

Accents of Terrarium complement the full range of Belgard colorations — whether on an urban rooftop or at a rural retreat, a suburban backyard or a seaside terrace. Signifying growth, vitality, and renewal, hints of this green in accents and decor help create your biophilic paradise at home.
**COLOR**

Belgard’s color of the year, **Terrarium** is a powerfully rejuvenating hue that amplifies and enhances our connection to the natural environments around us.
Texture plays an integral role in outdoor living design. The textures chosen can add a dimensional aspect, a time-worn aesthetic or an element of sophistication.

Scale

Depending on the design goals, the shape and size of a paver can help make an outdoor space look more cozy, more open and contemporary, or more in harmony with the surrounding environment.
Belgard® uses a variety of cutting edge technologies to improve product durability and make sure colors stand the test of time. Through the use of proprietary admixtures and in-line treatments, Belgard is able to protect our product from the very beginning; during the manufacturing process.

**TRUECOLOR™**
Enhances Color & Durability

**WHAT IS TRUECOLOR?**
Belgard’s exclusive premium surface level color-enhancing protectant. TrueColor enhances the original color depth of Belgard pavers and extends color fastness and durability over time. It also makes treated pavers more resistant to everyday wear and tear such as UV rays, stains and even acid. TrueColor is not a sealer, and does not create a glossy or wet look. It enhances the original color of the paver without losing the surface texture of real stone.

To find out which products are available with TrueColor, ask your contractor or your Belgard Dealer.

EFFLORESCENCE

**[ ef-luh-res-uh ns ] noun**

1. a white haze created by a chemical reaction that occurs when the lime or water soluble calcium oxide produced by cement reacts with water.

2. a natural, reversible byproduct of hardened concrete.

If efflorescence does occur, it can be removed with cleaners specially made for concrete pavers.

Careless or improper cleaning can result in damage and discoloration to the concrete paver surfaces. Contact your Belgard dealer or contractor for further information about appropriate, commercially available cleaners.

**ROUTINE CLEANING**

1. Use a stiff bristle broom and garden hose to scrub and clean the pavers.

2. **HIGH TRAFFIC ZONES** Add in some detergent to the water mix to dislodge dirt from the surface.

3. Scrub with push broom and rinse with garden hose.

**REMOVING OIL STAINS**

1. Wipe excess oil from the surface and apply liquid detergent as soon as possible.

2. Allow it to soak for several minutes, then wash with hot water.

Several treatments may be necessary for particularly stubborn stains.

Cleaners specially made for removing oil stains from concrete pavers are recommended.

**PREVENTING WEEDS & ANTS**

**YOU’VE GOT OPTIONS**

1. Remove by hand or with herbicides.

*Use with care so that adjacent vegetated areas are not damaged.* Opt for a biodegradable product that won’t damage other vegetation or pollute water supplies.

2. Apply a sealer over the entire paver surface and let cure.

**SNOW & ICE REMOVAL**

Concrete pavers offer outstanding freeze-thaw resistance.

1. Shovels or Plows

2. Electric or liquid snow-melting systems under concrete pavers.

Ask your Belgard dealer or contractor about Snow-melting Systems for Interlocking Concrete Pavements.
