## Benefits of Porcelain Pavers

- **STYLISH** - Porcelain takes available style options to a new level
- **EASY TO CLEAN** - With a tight surface texture, these pavers clean quickly
- **DURABLE** - Incredibly high breakage loads, up to 2,200 pounds
- **MODULAR** - For faster installation, simply lay as you go

## Resistant

### TO FREEZE THAW

Freeze thaw resistant —100% frost-free and properties remain unaltered at temperatures ranging from -51.1° to +60° C (-60° F to +140°F).

### TO BREAKAGE

Because every slab can withstand loads of over 2200 lbs.

### TO CHEMICAL AGGRESSION

Because our pavers are unaffected by alkalis, acids, chemical agents, salt and other de-icing materials.

### TO STAINS

Because a high density and ultra-low absorption rate creates a tight paver surface, it fends off surface mold, moss, dirt and other types of stains.

## Easier

### TO LAY

Because of superior accuracy in dimensional sizing and linear sides, the pavers allow for perfectly executed installations with tight and accurate lines.

### TO CLEAN

Because it can be cleaned with normal household cleaners and even pressure washed with a low pressure washing device.\*

### TO REMOVE

Because a 24" x 24" slab weighs just 37 lbs., its light weight permits easy removal, serviceability and even reusability. (Excluding adhered installations).

### FOR YOU

Because the structured top textures formed on the surface of our pavers create non-slip surfaces.

\* It is important that all pressure washing of your porcelain pavers be done with a low pressure washer with a maximum of 1600 psi and nothing more powerful. When pressure washing your installation, care should be taken to prevent damage to the grout (adhesive and grout installations) and some re-sanding will be necessary when power washing an installation with sand or polymeric sand joints.

## SHADE VARIATION:

**V1**-Uniform Appearance: Minimal to no difference among pieces.

**V2**-Slight Variation: Distinguishable differences in texture and/or pattern within similar colors.

**V3**-Moderate Variation: Though the colors present in a single piece may indicate the color patterns to be expected on other tiles, the amount of colors on each piece might vary significantly.

**V4**-High Variation: Random color variation from piece to piece, so that one paver may have a totally different color from the other pavers. Thus, the final installation will be unique.

To make sure that you get the look you are after, find out how much color shade variation the pavers have before you make your purchase. Reviewing physical samples along with the "Belgard Porcelain Swatch Book" is recommended to help you decide on the acceptable color shade variations.

As the color and details of our porcelain pavers may vary from piece to piece and from run to run it is recommended to work from multiple boxes/pallets of pavers to achieve a favorable mix with an even distribution of the inherent colors.

## TECHNICAL DATA

Standard Test Methods for Determination of Water Absorption	ASTM C373-18	Absorption = 0.0% per ASTM C373-18
Thermal Shock Resistance	ASTM C484-99 (2014)	Not affected by ASTM C484
Standard Test Method for Freeze-Thaw Cycling	ASTM C1026-13 (2018)	No visible damage
Resistance of Ceramic Tile to Chemical Substances	ASTM C650-20	Not affected
Crazing Resistance of Fired Glazed Whitewares by Autoclave Treatment	ASTM C424-93 (2016)	Not observed
Compressive Strength Testing is in accordance with ASTM C140	ANSI A137.3, Section 5.3.11	Higher than 30,000 psi
Determination of Breaking Strength and Modulus of Rupture	ASTM C1505	Breaking Load (P) lbf: 2,600 Breaking Strength lbf: 2,500 MOR psi: 6,000
Test Method for Evaluating Hard Body Impact Resistance	ANSI A137.3, Section 8.7	Passed at 18" pedestal support
Test method for Evaluating Soft Body Impact Resistance	ANSI A137.3, Section 8.6	Passed at 24" pedestal support
Determination of Resistance to Staining	ASTM C1378-20	Visual Test: "Not Affected"

## A Note About Square Footage

Square footage reflects the estimated area of coverage that the tile will provide once placed, after allowing for joint spacing of  $\frac{3}{32}$ "

### 12 x 24

Actual size of tile is 1.92 sq/ft per tile.

### 24 x 24

Actual size of tile is 3.85 sq/ft per tile.

### 24 x 36

Actual size of tile is 5.78 sq/ft per tile.

### 32 x 32
